InvoX

InvoX- AI-Powered AP Invoice Automation

" Easy Upload to Oracle Fusion/EBS– Fast, Accurate, Auditable "

Business Challenge :

- Manual invoice entry is time-consuming, error-prone, and lacks control.
- Approvals via email or offline methods delay processing and reduce visibility.
- Businesses need a unified, compliant, and AI-driven intake solution that integrates directly with Oracle Fusion.

Solution : InvoX

- InvoX is a smart, one-screen AP invoice automation solution.
- It enables users to upload, verify, approve, and post invoices to Oracle Fusion—seamlessly.

01 EASY UPLOAD

Single-screen interface to upload, review, and submit invoices.
Reduces friction and standardizes the intake process.

02 APPROVALS

Dynamic maker–checker workflow driven by LE, amount, and terms.
Auto-routes to approvers with zero manual effort.

03 ALERTS

Real-time in-app and Microsoft Teams notifications.
Approvers can view, comment, and act directly from alerts.

04 INTEGRATIONS

Pushes invoices to Oracle Fusion AP via secure REST APIs.
Includes direct deep link for quick access to invoice in Fusion.

05 AUDIT

End-to-end traceability of every action and approval.
Ensures control, compliance, and easy audits.
